SCIENCE FAIR

PROJECT KIT

Printable display-board headers, labels & planning pages

Name _____

Grade / Class _____

Instant download · Print at home or school · US Letter

HOW TO USE THIS KIT

Six steps from blank board to blue ribbon

1. **Plan**
   Fill in the planning pages — question, hypothesis, method, data, conclusion.

2. **Print**
   Print the header cards and labels on white or colored paper.

3. **Cut**
   Trim each header card along the rounded edge.

4. **Arrange**
   Lay out sections on your tri-fold board before gluing.

5. **Mount**
   Glue headers and your printed results in reading order.

6. **Present**
   Add your name plate and practice explaining each section.

What's included

- 12 display-board header cards (Question → Bibliography)
- 8 fill-in planning pages (method, variables, data table…)
- Project checklist + name plate
- Print-ready PDF, US Letter · 300 dpi

BOARD HEADERS

Cut out and mount along the top of each section

QUESTION

The problem I investigated

HYPOTHESIS

My prediction

BOARD HEADERS

Cut out and mount along the top of each section

MATERIALS

What I used

PROCEDURE

How I did it

BOARD HEADERS

Cut out and mount along the top of each section

VARIABLES

What I changed & measured

DATA

My measurements

BOARD HEADERS

Cut out and mount along the top of each section

RESULTS

What the data show

ANALYSIS

What it means

BOARD HEADERS

Cut out and mount along the top of each section

CONCLUSION

What I found out

ABSTRACT

Project summary

BOARD HEADERS

Cut out and mount along the top of each section

BIBLIOGRAPHY

My sources

ACKNOWLEDGMENTS

Who helped me

RESEARCH QUESTION

Start here

What are you trying to find out? Write it as one clear question.

Why is this interesting or useful?

Keywords to research

HYPOTHESIS

Your best prediction

If … then … because …

My hypothesis

What do you predict will happen, and why?

VARIABLES

Keep it a fair test

INDEPENDENT	DEPENDENT	CONTROLLED
What I change	*What I measure*	*What I keep the same*

MATERIALS

Everything you need

List everything you need. Check items off as you gather them.

- [ ] _____
- [ ] _____
- [ ] _____

PROCEDURE

Step by step

Write each step in order. Anyone should be able to repeat it.

1.

2.

3.

4.

5.

6.

7.

8.

9.

10.

DATA TABLE

Record your trials

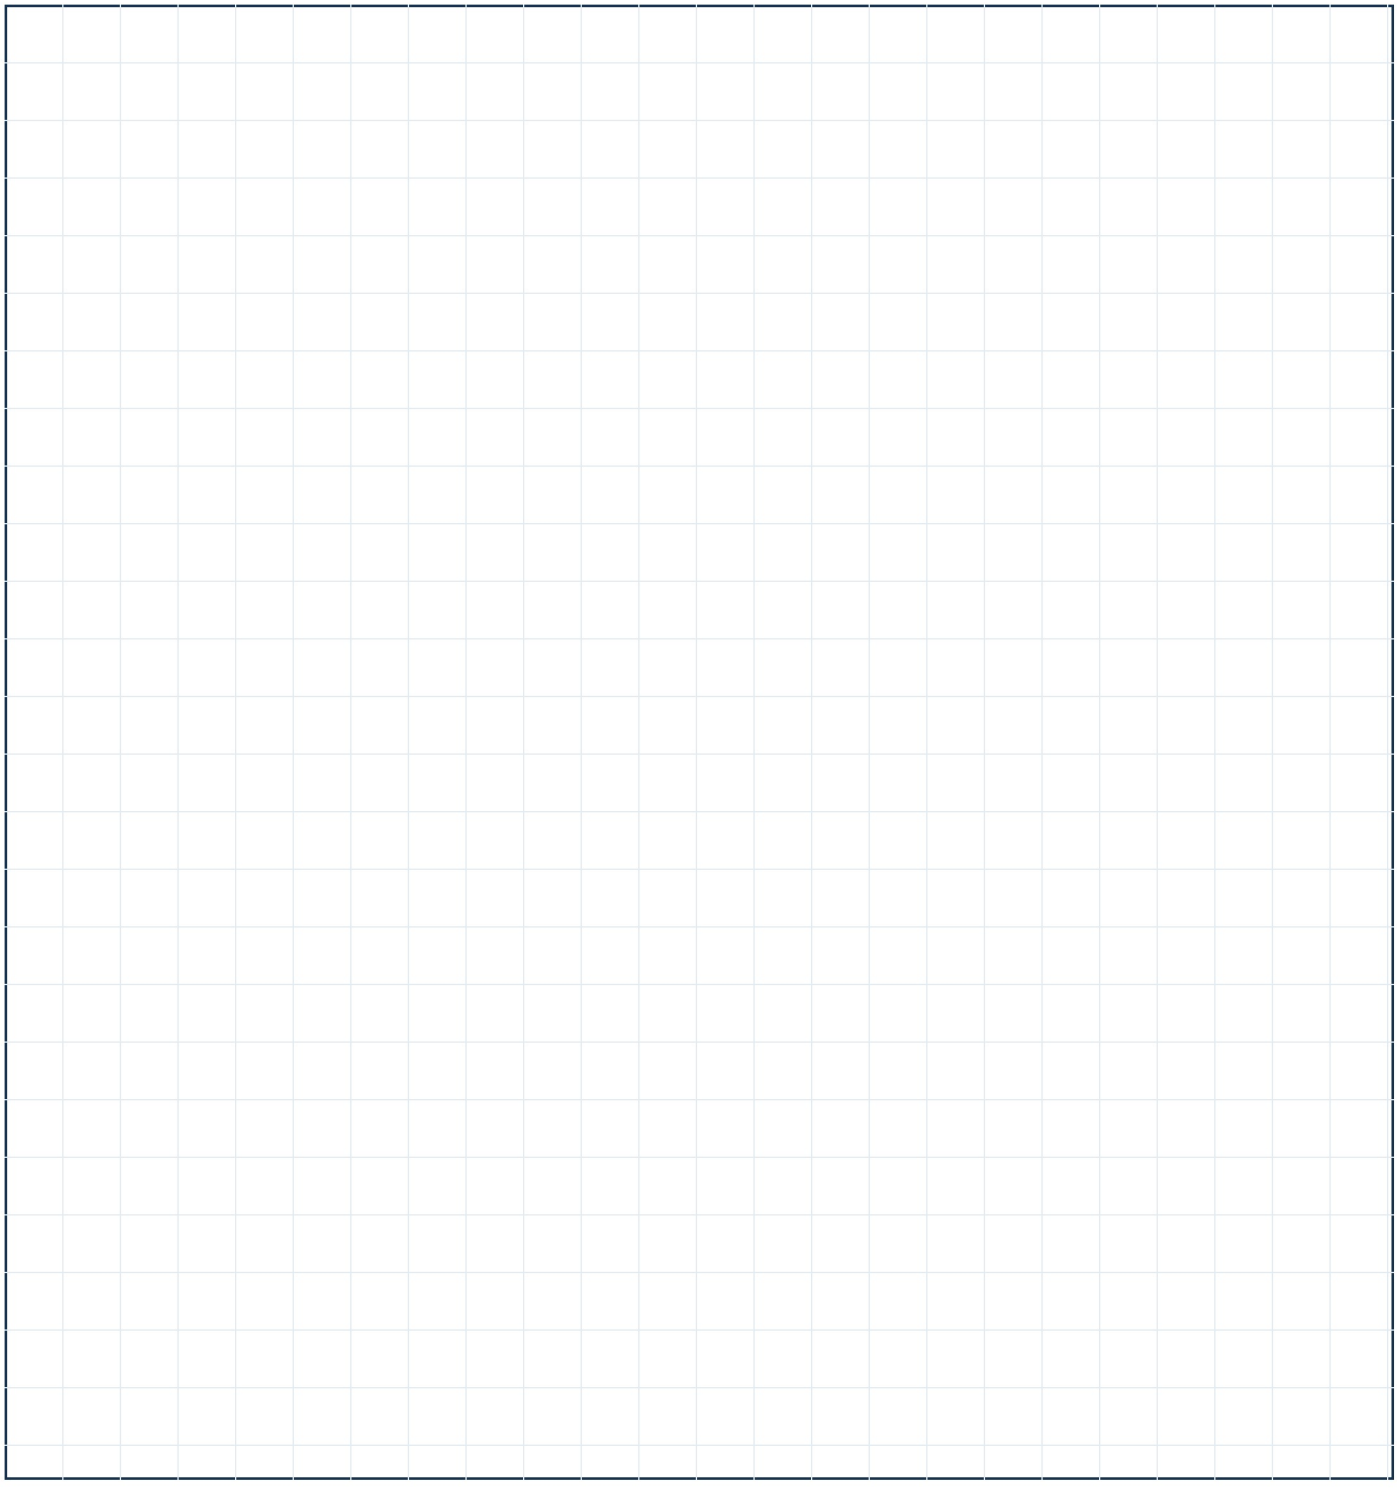

Record your measurements. Repeat trials for reliable results.

Trial	Condition	Measurement	Notes

RESULTS

Graph your data

Graph your data. Label both axes and give the graph a title.

x-axis

CONCLUSION

What you learned

Was your hypothesis supported? What did you learn?

What would you do differently or try next?

PROJECT CHECKLIST

Ready for the fair?

Tick each piece off before the fair.

- [ ] Chose a testable question
- [ ] Wrote a clear hypothesis
- [ ] Listed variables (independent / dependent / controlled)
- [ ] Gathered all materials
- [ ] Wrote a repeatable procedure
- [ ] Ran trials and recorded data
- [ ] Made a graph of results
- [ ] Wrote the conclusion
- [ ] Cited sources / bibliography
- [ ] Printed and mounted all headers
- [ ] Added name & class plate
- [ ] Practiced my presentation
