ALEX RIVERA

Data Scientist · Applied Mathematics

alex.rivera@email.com · (555) 014-2088 · San Francisco, CA · linkedin.com/in/alexrivera

PROFESSIONAL SUMMARY

Data scientist with 6+ years translating statistical models into product decisions. Strong in causal inference, experimentation, and production ML. Known for clear communication with engineering and leadership — turning ambiguous questions into measurable outcomes.

CORE SKILLS

Python · SQL · R · PyTorch · scikit-learn · dbt · Airflow · A/B testing · Causal inference · Bayesian modeling · Experiment design · Stakeholder storytelling

EXPERIENCE

Senior Data Scientist 2021 – Present

Northline Analytics · San Francisco, CA

- Owned experimentation platform serving 40+ product squads; cut time-to-insight by 35%.
- Shipped propensity models that lifted paid conversion +12% ($4.2M incremental ARR).
- Mentored 4 junior scientists; established model-review checklist adopted org-wide.

Data Scientist 2018 – 2021

Helix Health · Remote

- Built risk-stratification models for 1.2M patient records; reduced false positives 18%.
- Partnered with clinical ops to redesign dashboards used daily by 200+ care managers.
- Published internal white paper on uplift modeling for care outreach programs.

Research Analyst 2016 – 2018

University Lab for Computational Social Science

- Analyzed large-scale survey panels with hierarchical Bayesian models in R and Stan.
- Co-authored peer-reviewed paper on network effects in online learning platforms.

EDUCATION

M.S. Statistics 2016

University of California · GPA 3.9

B.S. Applied Mathematics 2014

Georgia Institute of Technology · Magna Cum Laude

SELECTED WORK

- Open-source contribution: experimental design utilities for Python (1.8k GitHub stars).
- Invited talk: “Causal Inference in Product Analytics,” Data Council 2024.
