How to use this suite

1. Open Guest_List_Template.csv in Google Sheets or Excel.
2. Add every guest and assign a table number.
3. Open the blank PDFs (or edit the SAMPLE files as a visual guide).
4. Edit text in Adobe Acrobat, Preview (Mac), or import pages into Canva/PowerPoint.
5. Print seating chart poster-size or US Letter tiled; print cards on heavy cardstock.
6. Cut place cards and table numbers along the rounded frames.

Design notes

• Palette: navy, gold, cream — matches a modern editorial wedding.

• Geometry: corner marks and circles reference the golden ratio (phi).

• Brand: MathRelaxing — precision design for celebrations, not florals.
