■ Voronoi Gardens

Interactive Color-By-Number for iPad

Thank you for your purchase! This bundle contains **50 interactive Color-By-Number designs** that run directly in your iPad's Safari browser. No app installation needed. Because they use vector graphics (SVG), you can zoom in infinitely without any pixelation.

■ What's Included

- **50 HTML files** — one interactive design per file
- **This instructions PDF**
- All files work 100% offline — no internet required

■ Getting Started on iPad

Step 1 — Download the ZIP

Download the ZIP file from Etsy to your iPad. It will appear in the **Files** app.

Step 2 — Unzip

Tap the ZIP file in the Files app. It will automatically extract into a folder containing the 50 HTML files.

Step 3 — Open in Safari

Tap any HTML file (e.g., **SpiralTilings_CBN_01.html**). If it doesn't open in Safari directly, tap the **Share** button (↑) and choose **"Open in Safari"**.

■ *Tip: You can also use any browser like Chrome or Firefox.*

■ How to Color

1. At the bottom of the screen you'll see a **color palette** with 30 numbered colors.

2. Tap a color to select it. The selected color gets a white border.

3. Now tap any zone on the design that shows **the same number** as your selected color.

4. The zone fills with color and the number disappears! ■

5. If you tap a zone with the **wrong** color, the border flashes red briefly — pick the matching color and try again.

■ Zoom & Pan

- **Pinch to zoom** in and out — lines stay perfectly crisp at any zoom level
- **Drag with one finger** to pan around the design

• Use the **+ /** – buttons (bottom right) for quick zoom

■ *Tip: Zoom in on the center of the spiral to find the tiny zones. The numbers scale to fit each zone perfectly!*

■ Saving Your Progress

Your progress is **saved automatically** in your browser. You can close the tab, turn off your iPad, and when you reopen the same file in Safari, your coloring will be right where you left it.

■■ **Important:** If you clear Safari's website data (Settings → Safari → Clear History and Website Data), your progress will be lost. Avoid doing this while you have designs in progress.

■■ Undo & Clear

• **Undo** button (top right): reverses your last coloring action

• **Clear All** button (top right): resets the entire design to white (asks for confirmation)

■ Also Works On

These files work on **any device with a modern browser**: iPhone, Android tablet, PC, or Mac. On a computer, use mouse click to color and scroll wheel to zoom.
