◇

A PRIVATE LOGBOOK

Password & Login

Websites, Wi-Fi, apps & recovery notes — kept quietly in one place.

A paper companion to your password manager.
Not a replacement — a private record you control.

- Categorized credential cards
- Home network & Wi-Fi sheet
- Recovery & 2FA notes
- Password change history

US LETTER · PRINTABLE

How to use this tracker

This book is for private offline use. Fill only what you need. It complements a modern password manager — it does not replace one.

WORKFLOW

- Print on US Letter, or open the PDF in a notes app on a tablet.
- Begin with Email, Banking, and Wi-Fi — highest-impact accounts.
- Record recovery email, phone, and 2FA method in the recovery fields.
- When you rotate a password, add a line on the Change history page.
- Keep the binder or device in a locked place; avoid cloud photos of filled pages.
- Tell one trusted person where the book lives — not what is inside.

SECURITY NOTES

Prefer unique passwords; this log helps you remember them, not reuse them. Never store a password-manager master password here. If a page is lost, change those passwords first. Optional: use a private shorthand only you understand.

A NOTE ON SCOPE

Household emergency organizers should only record where digital access lives. This tracker is the dedicated place for login details — keep the two separate.

Contents

	Section
	How to use & security
	Contents
	Master recovery sheet
	Home network & Wi-Fi
01	Email & cloud accounts
02	Banking & finance
03	Shopping & payments
04	Streaming & entertainment
05	Social & messaging
06	Work & school
07	Devices & apps
08	Utilities & subscriptions
09	General log pages
	Password change history
	Quick notes

Tip: print double-sided and use tab dividers labeled 01–09 for a slim binder.

Master recovery sheet

High-level recovery only — do not write a password-manager master password here.
