Coloring on Your iPad

Celtic Knot Mathematics · iPad Edition

In GoodNotes or Notability

Open the PDF and tap any thumbnail in the index to jump straight to a design. Color directly on top of the line art with any brush — it stays crisp underneath. Duplicate a page to color it again.

In Procreate

Import a transparent PNG from the ZIP. Add a new layer BELOW the line art and paint there, so the woven bands always stay on top. Load CelticKnot.swatches for a ready-made palette (30 colors).

Tips

- Use the color-fill / ColorDrop tool to flood whole sections.
- Everything is reusable forever — color each design as often as you like.
