MathRelaxing

Coloring on Your iPad

Fractal Flora · iPad Edition

No printer, no mess · just you, your Apple Pencil, and fifty fractal gardens.

In GoodNotes or Notability

Open the PDF and begin on the index page. Tap any design to glide straight to it, then color right on the artwork with whichever brush you love. Layer washes, blends and gradients freely.

In Procreate

Drop a transparent PNG onto a fresh canvas. The linework rests on its own layer, so paint on a layer beneath it and every stroke stays effortlessly within the lines. Import the included palette for a ready-made garden of colors.

A gentle note

These are open, free-form designs · no numbers, no rules. Follow the palette or invent your own. Zoom in for the finest curves, and let each fractal bloom however you feel. There is no rush here · unwinding is the whole point.
