Geometric Color by Number

Interactive Color-By-Number for iPad

Thank you for your purchase! This bundle contains **20 interactive Color-By-Number designs** that run directly in your iPad's Safari browser. No app installation needed. Because they use vector graphics (SVG), you can zoom in infinitely without any pixelation.

What's Included

20 HTML files -- one interactive design per file

This instructions PDF

All files work 100% offline -- no internet required

Getting Started on iPad

Step 1 -- Download: Download the ZIP from Etsy to your iPad (Files app)

Step 2 -- Unzip: Tap the ZIP in Files. It extracts automatically

Step 3 -- Open: Tap any HTML file. If needed, use Share > Open in Safari

How to Color

1. Tap a **numbered color** from the palette bar at the bottom

2. Tap any zone showing **the same number**

3. The zone fills with color and the number disappears!

4. Wrong color? The border flashes red -- pick the right one

Zoom and Pan

Pinch to zoom in and out -- lines stay perfectly crisp

Drag with one finger to pan around the design

Use the **+ / -** buttons (bottom right) for quick zoom

Saving Your Progress

Progress is **saved automatically** in your browser

Close the tab, reopen the file later -- your coloring is preserved

Avoid clearing Safari data while designs are in progress

Undo and Clear

Undo button (top right): reverses your last coloring action

Clear All button: resets the entire design (asks for confirmation)

Also Works On

These files work on **any device with a modern browser**: iPhone, Android, PC, or Mac
